'Hi, my name is Zsolt. At first, thank you for your time to read my CV. It's been nearly 3 years when I touched an ebook from J.Lengsoft what gave me hunger and very strong desire to express myself in coding. Opportunity came via my current employer to create and implement scanning allocation system where I used my knowledge from HTML/CSS, PHP and JQuery. Nowadays I focus more on ASP.NET and C#. I think it's time to become a Junior developer and learn from professionals.'
