'Hi, my name is Zsolt. At first, thank you for your time to read my CV. It's been nearly 3 years now since I had the first development e-book from J.Lengstoft in my hand what gave me hunger and very strong desire to express myself in coding. Opportunity came via my current employer to create and implement a scanning allocation system where I used my knowledge from HTML/CSS, PHP and JQuery. Nowadays I focus more on ASP.NET and C#. I think it's time to become a Junior developer and learn from professionals.'
